The WCP

The Weekly Coal Production (WCP) provides weekly production estimates of U.S. coal by rank, as well as supplementary data which are published twice a month. Supplement 1 includes monthly statistics on U.S. coal production and aggregated annual historical data on coal supply and demand, consumption, stocks, imports, and exports. Supplement 2 contains monthly data covering electric utility coal consumption, stocks, and receipts; and coal imports and exports.

This publication is prepared by the Coal Division; Office of Coal, Nuclear, Electric and Alternate Fuels; Energy Information Administration (EIA) to fulfill its data collection and dissemination responsibilities as specified in the Federal Energy Administration Act of 1974 (P.L. 93-275) as amended. Weekly Coal Production is intended for use by industry, press, State and local governments, and consumers. Other publications that may be of interest are the quarterly Coal Distribution Report and the Quarterly Coal Report.

General information about this publication may be obtained from Robert Harris, Chief, Data Systems Branch, Kenneth Shanks, or Judith Wood. For specific information on the contents of this publication contact the National Energy Information Center (NEIC) at (202/252-8800).

Highlights

Production of bituminous coal and lignite in the week ended April 20, 1985, as estimated by the Energy Information Administration, 17,386,000 short tons. This was a decrease of 238,000 short tons or 1.4 percent from production in the previous week. Production in the corresponding week of 1984 17,896,000 short tons. Bituminous coal and lignite production from January 1 through April 20, 1985 totaled 265,602,000 short tons, and from January 1 through April 21, 275,537,000 short 1984 totaled tons.

Production of Pennsylvania thracite in the week ended April 1985, as estimated by Energy Information Administration. was 74,000 short tons, 1,000 short tons less than production in the previous week. Production in the corresponding week of 1984 was 57,000 short tons. Anthracite production from January 1 through April 20, 1985 totaled 1,161,000 short tons, and from January 1 through April 21, 1984 totaled 978,000 short tons.
